### User Friendly – All in One Solution

Pure bacterial culture in an easy to use swab stick. Simple snap valve design releases hydration fluid with a simple press of the plastic valve stem. Cultures are supplied in flash dissolve format, dissolving without agitation or incubation in less than 1 minute. Fast, convenient and a glass free hydration reservoir.

### Traceable and Close to the Source

Derived from pure ATCC strains and always just a single passage from the reference culture. Single passage from primary culture ensures maximum traceability.
