

# Gluten Analysis by ELISA Reference Materials

*Performance and Values Certified for Multiple Methods*

## *Innovative Controls to Support Data Quality*

Manufactured using intact wheat gluten and certified by multiple ELISA methods, our new gluten reference materials can be used for both qualitative and quantitative applications. Formulated at 4 levels: blank, low, mid, and high. Nominal values are 0, 10, 20 and 40 mg/kg as gluten respectively, with actual method performance values listed on the COA.
